

# SUSTAINABILITY

## BURNED !

NG3's ECOFLARE is an efficient way to dispose of the unavoidable boil-off gas onboard LNG powered or LNG bunker vessels. With the unique "flat burner", low weight and space requirements, ECOFLARE is ideally suited for most installations.

## LEAN & GREEN !

The LEAN PROPULSION system from STADT AS

- reduced fuel consumption
- high redundancy, long service life
- reduced maintenance requirements
- modular architecture through The Cube™ standards
- optimized for "Slow Steaming"
- reduced NOx, SOx, BC and CO2 emissions
- flexible in the power source

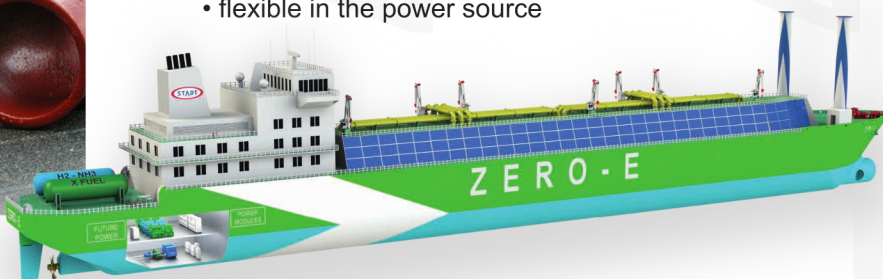

## 'SICK OF IT !'

you are sick of clogged drain pipes in the vacuum system on board your ship? Our products offer an effective, safe and biodegradable instant solution!

For long-term keeping free, we offer a manual but also automatic cleaning concept. You decide!

## 1,2,3 - WIRED !

NG3's PLUG shore power solution provides a fast and secure, automated connection to the shore power grid and avoids emissions while in port. It can be adapted to all ship types and shore requirements.

## Ready for ZERO EMISSION shipping
